PROFESSIONAL EXPERIENCE

Digital Cost Estimation
Backend developer
09/2024 – 07/2026

- Developed platforms for employee management, project budget planning, and construction cost estimation.
- Created custom plugins for Revit and Archicad to export and report BIM data.
- Built cost estimation tools for generating bills of quantities.

ACORN APPRAISALS
Software developer
09/2025 – 08/2026 | Canada

- Developed a comprehensive Smart Evaluation system for structured reporting, interactive charts, tables, and visual assets.
- Built collaboration features and scalable PDF/Word report generation.
- Containerized application services with Docker and streamlined development and deployment environments.
- Built modern, responsive business applications and integrated backend services.

Is Technologies Lt
Front-end developer
04/2024 – 01/2025 | Rubavu, Rwanda
Developed a secure, interactive web application using React.js and Tailwind CSS, with a focus on usability and responsive design.

Upwork
Freelancer
02/2024 – 12/2025 | Remote
Serves as a top-rated freelancer at upwork, contribution to many projects.

Kick side Rwanda
Frontend Developer
08/2024 – 12/2024

- Developed modern websites, including the official Kickside newspaper publishing site.
- Collaborated with backend teams on software solutions.
- Implemented responsive designs and optimized user experience.
- Worked with Git and containerized development workflows.

EDUCATION

Software Programming and Embedded Systems
Rwanda Coding Academy
09/2023 – 07/2026 | Nyabihu

SKILLS

Programming Languages ●●●●○
JavaScript · TypeScript · Python · Java · SQL

Frontend Development ●●●○○
React · React Native · Next.js · HTML5 · CSS3 · Tailwind CSS · Responsive Design

Backend Development ●●●●●
Node.js · Express.js · RESTful APIs · Authentication · API Integration · Prisma · Server-Side Development

Databases & Data ●●●●○
PostgreSQL · MySQL · MongoDB · Database Design · SQL · Data Modeling

DevOps & Cloud ●●●●●
Docker · Docker Compose · Kubernetes · Linux · CI/CD · GitHub Actions · Nginx · AWS · Cloudflare · Vercel · Environment Configuration

Version Control & Development Tools ●●●●●
Git · GitHub · Postman · VS Code · API Testing · Debugging

AI-Assisted Development ●●●●○
Claude Code · Cursor · Windsurf · LLMs · AI APIs · Prompt Engineering · OCR

Other Technologies ●●●●●
BIM Technologies · Revit API · Archicad · PDF/Word Generation

PROJECTS

Ranga
AI Powered Lost and Found Platform for Rwanda
05/2026 – 08/2026
Built Ranga, an AI-powered lost-and-found platform for Rwanda that helps people recover lost belongings and important documents before seeking replacements through services like Irembo. Implemented intelligent matching, OCR, sensitive-data blurring, identity verification, and secure rewards.

Zero QS
AI-Augmented Quantity Surveying Platform for Africa
09/01/2026 – 12/08/2026
Built Zero QS, an AI-augmented quantity surveying platform designed for African construction professionals. The platform helps quantity surveyors build Bills of Quantity (BOQ) and Bills of Materials (BOM) automatically using AI and results are automatically sent to take off project specific.

HOBBIES

- Coffee-fueled coding sessions
- Swimming
- Exploring cryptocurrency and blockchain
